

## ●●● **RBpoint**

**RBpoint** – green light for the Roland Berger project organization and information network tool

Managing large projects is hard work.  
Make it easier and use RBpoint.  
It paves the way for a holistic success management.

### ●●● **RBpoint** – our software brand:

... was designed by our IT Consulting team at .bits

... was developed based on many years of project experience

### **Seven good reasons for using RBpoint**

- > Real-time overview of the project status using customized reports
- > Systematic monitoring of financial impact
- > Consequent top-down planning, transparent bottom-up controlling
- > Active collaboration between clients and consultants
- > Efficient knowledge sharing by integrating all project-related documents
- > Flexible configuration according to the needs of your project
- > Unlimited number of users, not subject to a license agreement

## ●●● RBpoint

**RBpoint** – project structuring, financial impact tracking, reporting, and team support

RBpoint modules can be configured according to your project needs

- > **Subprojects**    Insert and handle all of your actions
- > **Documents**    Manage documents related to your subprojects
- > **Reports**        Analyze the progress of your planned actions
- > **Newsticker**     Publish project relevant information to the team
- > **Addresses**     Create address and mailing lists of your team
- > **My profile**     Adjust the system to your individual requirements, e.g. language, password

*Steering in the right direction!*

For questions concerning the installation, use and configuration of RBpoint, please contact the .bits | IT Consulting team:
